

New!

CMC100

Crawlspace-Ready, Professional Grade Dehumidifier

HIGH PERFORMANCE & EASY INSTALLATION – IN A COMPACT PACKAGE

The new CMC100 is specially designed for ease of installation and effectiveness in humid crawlspaces and basements:

- **Compact Dimensions** – The shortest vertical clearance on the market in applications where condensate pump-out is required: just 10” wide and 14” tall (including built-in condensate pump)
- **Convenient Installation** – Fits easily between floor joists, in low clearance areas or on a basement bookshelf
- **Unmatched Flexibility** – Unique interchangeable panel design allows for multiple airflow configurations: straight-path (tunnel) design, air intake/outlet on one side (“U” shaped), or a combination (“L” shaped)
- **Built-in Pump** – No external pump needed: unit automatically pumps out water to suitable receptacle or drain
- **Energy Star™ Qualified** – High performance: up to 70 pints per day water removal while drawing just 5.3 amps

From Dri-Eaz, the leading name in professional portable dehumidifiers

For the last 25 years, we’ve been known for building high performance, rugged dehumidifiers that help dry after flooding from natural disasters and household floods. Now we bring that expertise to tackle the most challenging and prevalent moisture control issue in the home: continuous moisture control in basements and crawlspaces.
