

MA-115P
FOR PLENUM MOUNTING

LISTED
HUMIDIFIER

Compact steam models that fit in tight places Especially designed for heat pump systems

MA-115
FOR UNDER THE DUCT

The Vapormax[®] is like having a tea kettle in your furnace—making sure pure steam vapor is distributed throughout your house. Self enclosed heating element saves energy by heating exact amounts of cold water — offering significant savings over units that use pre-heated hot water. Operates at full capacity, then shuts off, preventing wasted energy and uneven humidity.

- Fits any forced air system
- All parts of non-corrosive material
- Fits anywhere on your furnace
- Exclusive overflow system
- Wall mounted remote humidistat for accuracy
- Ideal for heat pump

Humid-Aire VAPOMAX
